

Split Nine-Patch with a Twist

Create 9-Patch units then cut them in half horizontally and vertically.

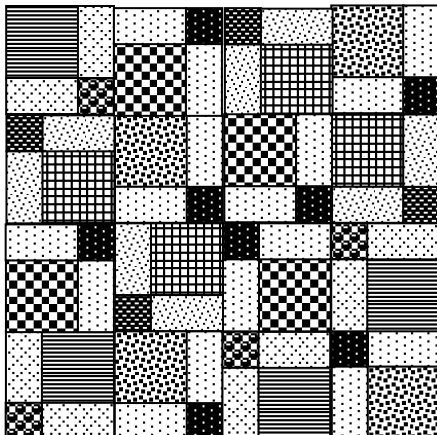

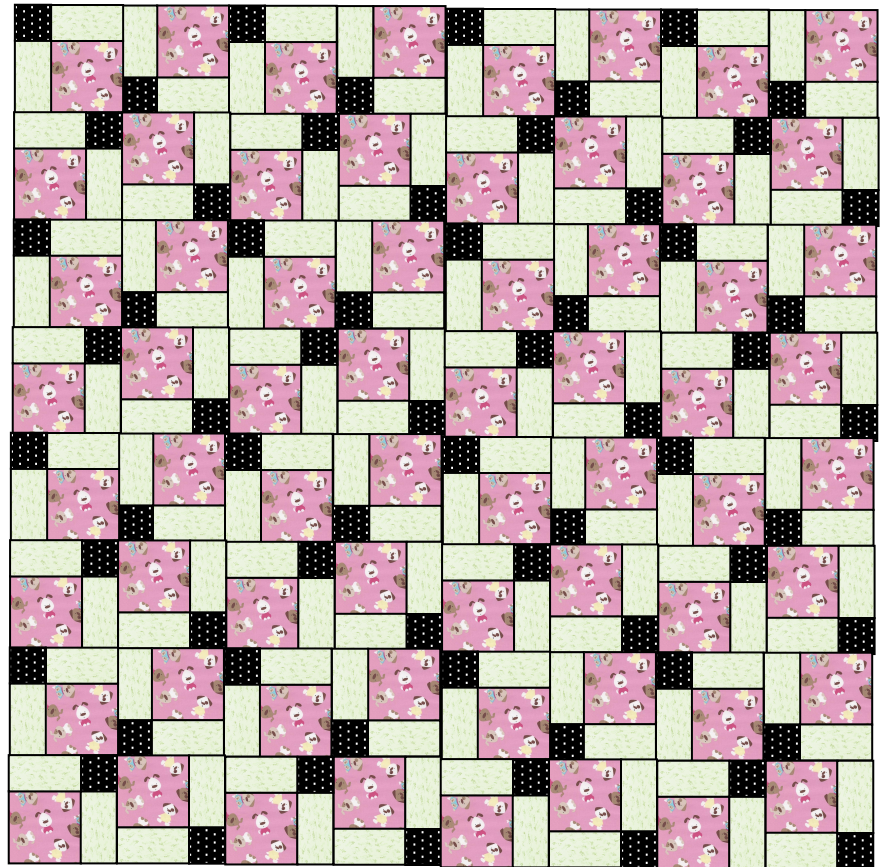

Dark, Medium, Light... in the same position on each unit would create one pattern, or the variations are endless.

Place in rows or pinwheel style.

If you start with 6-1/2" strips or squares, the cut blocks should measure 9-1/4" square when cut and 8-3/4" square finished.

Assemble rows – press each row in the opposite direction.

Scrappy squares can also produce a variety of options.
